In many Dutch and German cities, residential streets are now places where cars must give ways to pedestrians. In these traffic calmed areas, residents and visitors accept the view that the function of streets is not merely to provide mobility for cars. Streets may also be used for walking, cycling, playing and other social interactions. One of the most important aspects of these streets in the range of "traffic calming" initiatives, aimed at reducing the volume and speed of traffic. These initiatives lead to several positive effects on children's social interaction. Recent research has demonstrated that children in German cities have significantly higher level of freedom to travel to places unoccupied by adults in their own neighbourhood than children in other-cities of the world.

One of the main purposes of "traffic calming", as understood from the above passage is to :

**Options :**

67603329133. calm the children playing on the street.

67603329134. reduce the speeds of vehicles on the street.

67603329135. reduce the noise created by traffic on the street.
